

Gobstones

ITEMS NEEDED

- Chalk to draw circle (See set up notes for alternatives)
- Gobstones
(Since these are difficult to find in Muggle stores, Marbles can be used instead. Only difference is that marbles will not shoot foul smelling liquid at the loser)

OBJECT OF THE GAME

The goal is to knock gobstones (marbles) out of the circle

SET UP

Draw a circle with chalk, in the dirt or on a large piece of paper. (*Size of circle depends on area of play and amount of marbles*)

Place 5-10 gobstones in the center of the circle

THE PLAY

When it's your turn, kneel outside the ring and flick your shooter gobstone out of your fist with your thumb, trying to hit as many gobstones out of the ring as you can.

To shoot the gobstone, typically a player will use their thumb to flick the gobstone from their hand putting their "knuckles down" onto the ground.

The goal of each shot is to hit one of the gobstones in the center and knock it out of the circle.

If you knock any gobstones out of the ring, keep them and have another turn. If no gobstones are knocked out, play moves to next player.
