

Create a Hogwarts House Fortune Teller

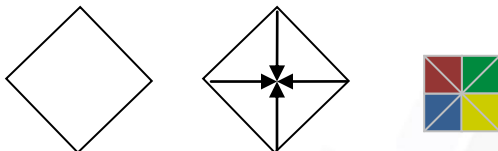

1. Cut out the template fortune teller and place it so that the coloured corners face down. Fold one corner to the opposite corner, making a triangle. Open your triangle back into a square, and do the same with the two remaining corners. Then, open your triangle back into a square again. Your fortune teller should have an X-shaped crease:

2. Fold all corners to the centre of the square. This will create a smaller diamond, with your coloured corners facing up:

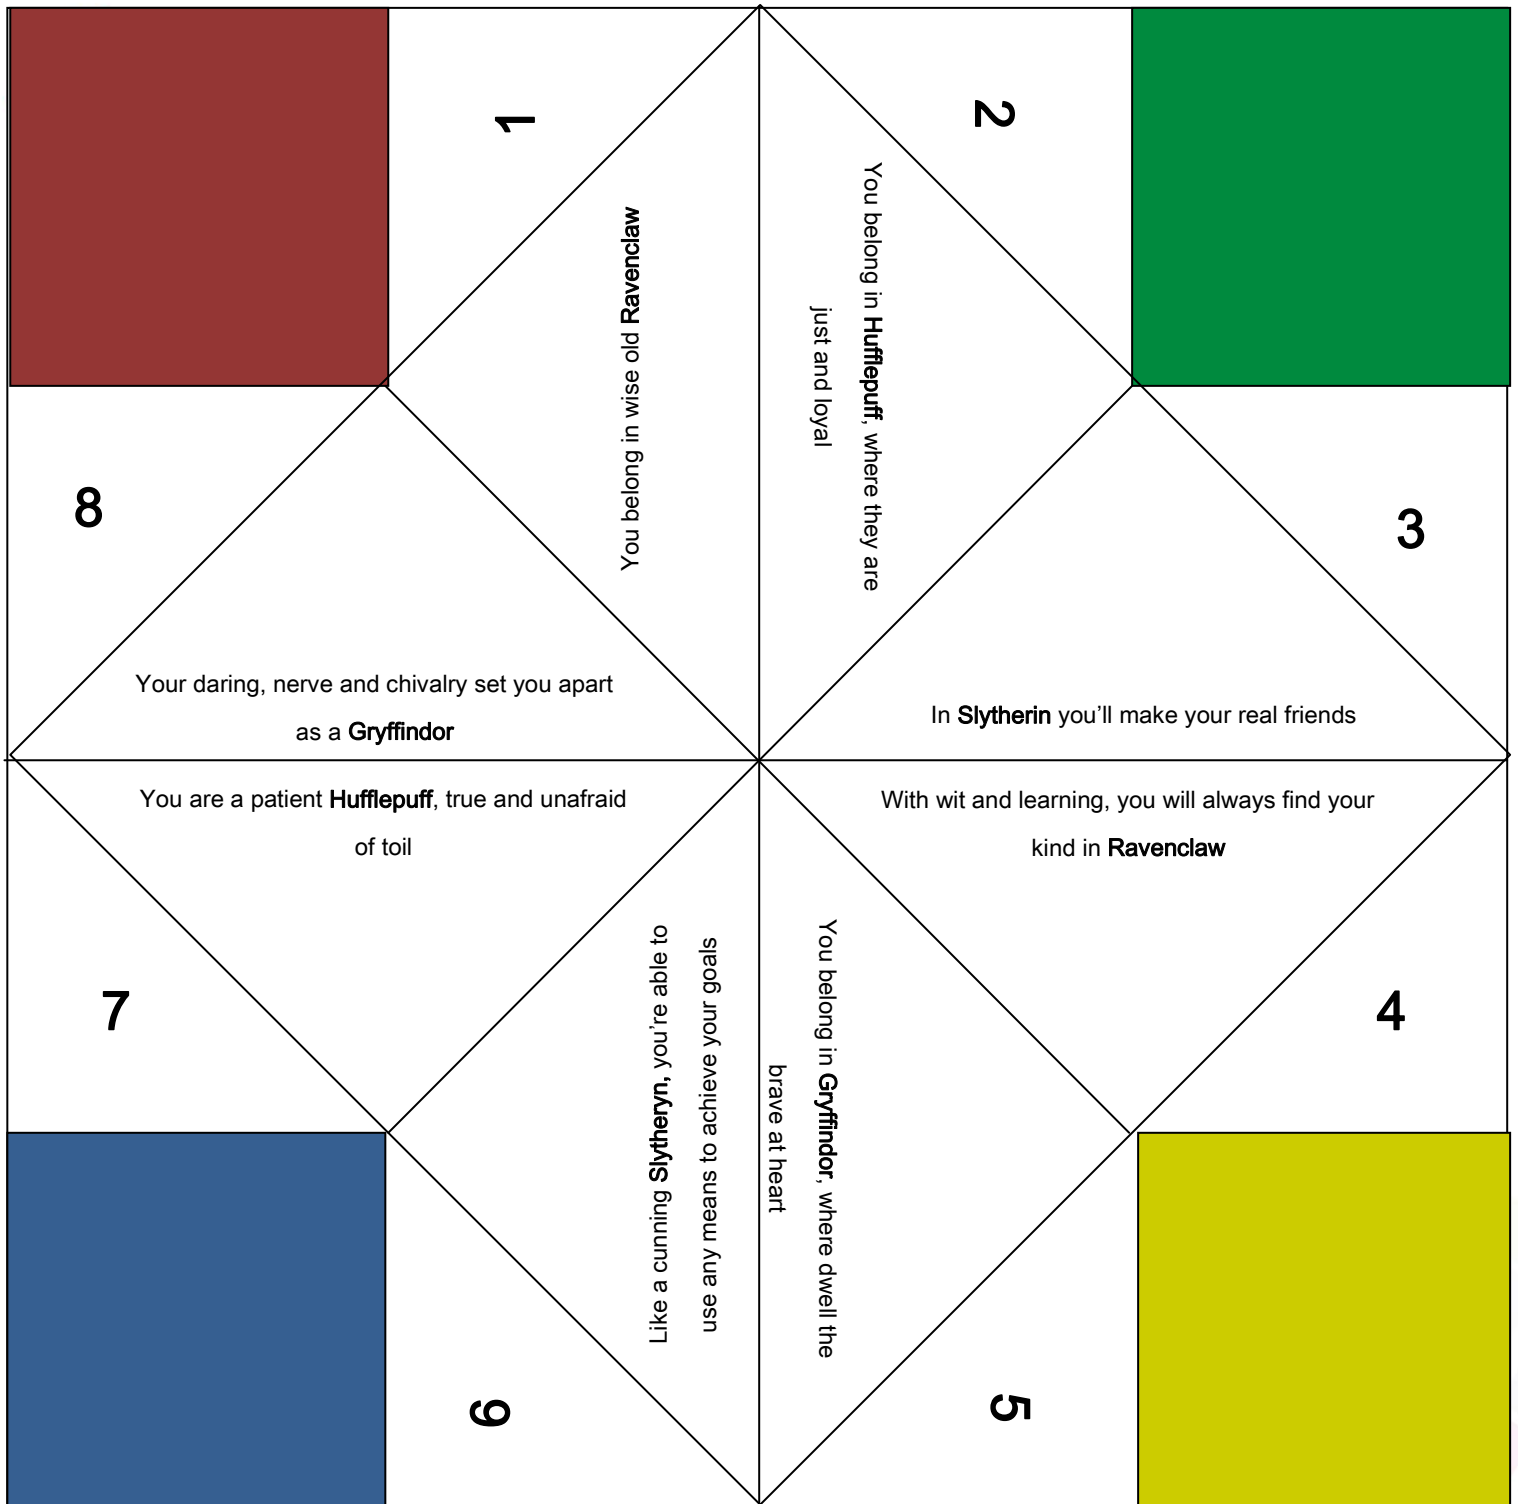

3. Next, turn your diamond over so the colors face down, and fold all corners to the center. This will create a smaller square, with the colors face up:

4. Turn your fortune teller over and insert your fingers in the four squares. You're ready to get sorted!

How to play:

1. Pick a colour. If you pick RED, open and close the fortune teller 3 times: 1 time for each letter in the word. If you pick BLUE, open and close the fortune teller 4 times...
2. Choose a number. Open and close the fortune teller that number of times.
3. Choose another number. Open its flap and read your fortune!
